FOR IMMEDIATE RELEASE

Team RV to Perform Lyrical Air Show over Pensacola Beach

(Atlanta, GA) June 29, 2011 – Pensacola Beach is front row center stage July 8 and 9 for the 2011 Pensacola Beach Air Show. When Team RV, the world's largest air show team, enters show center above Santa Rosa Island the audience will see a distinctive performance often described as a ballet in the sky. Twelve pilots weave smoke trails that linger just above the water as they execute lyrical yet high energy choreography filled with precision formation, formation aerobatics, close trail and opposing passes.

Mike Stewart, Team RV Flight Lead and Founder said from a pilot's perspective Pensacola Beach is a special venue. "The white sand beach contrasted by the blue water, stable air, and the landmark pier provide the perfect environment for a memorable air show," Stewart said. Team RV performed here last year and has since added new maneuvers and two new team members.

The 12 pilots who comprise Team RV have various backgrounds in military, commercial, corporate, and civilian flying with a combined experience of about 90,000 hours of flying time. They fly RV kit series aircraft, capable of speeds well in excess of 200 miles per hour and stressed for 6 g's. Most pilots on the team built their own aircraft and the various paint schemes reflect the custom nature of this experimental plane.
